

Scale Drawings Notes

A **SCALE DRAWING** is a diagram/map/model of an object that is too large or too small to draw. The dimensions are proportional to the actual dimensions (distances) of the real-life example. **Maps, blue prints, floor models are some examples.*

The **SCALE** on a scale drawing is the ratio of the drawing lengths or model to its corresponding actual lengths.

"1 in : 12 ft" means that 1 inch in the model represents an actual distance of 12 feet.

"Scale" dimensions in the scale drawing.
