## Lesson 5: Identifying Proportional and Non-Proportional

## Relationships in Graphs

## Classwork

## Opening Exercise

Isaiah sold candy bars to help raise money for his scouting troop. The table shows the amount of candy he sold compared to the money he received.

| $\boldsymbol{x}$ <br> Candy Bars Sold | $\boldsymbol{y}$ <br> Money Received (\$) |
| :---: | :---: |
| 2 | 3 |
| 4 | 5 |
| 8 | 9 |
| 12 | 12 |

Is the amount of candy bars sold proportional to the money Isaiah received? How do you know?

## Exploratory Challenge/Examples 1-3: From a Table to a Graph

## Example 1

Using the ratio provided, create a table that shows money received is proportional to the number of candy bars sold. Plot the points in your table on the grid.

| $\boldsymbol{x}$ <br> Candy Bars Sold | $\boldsymbol{y}$ <br> Money Received (\$) |
| :---: | :---: |
| 2 | 3 |
|  |  |
|  |  |
|  |  |

Lesson 5:

## Important Note:

Characteristics of graphs of proportional relationships:

## Example 2

Graph the points from the Opening Exercise.

| $\boldsymbol{x}$ <br> Candy Bars Sold | $\boldsymbol{y}$ <br> Money Received (\$) |
| :---: | :---: |
| 2 | 3 |
| 4 | 5 |
| 8 | 9 |
| 12 | 12 |

## Example 3

Graph the points provided in the table below, and describe the similarities and differences when comparing your graph to the graph in Example 1.

| $\boldsymbol{x}$ | $\boldsymbol{y}$ |
| :---: | :---: |
| 0 | 6 |
| 3 | 9 |
| 6 | 12 |
| 9 | 15 |
| 12 | 18 |

Similarities with Example 1:

Differences from Example 1:

Lesson 5:

## Lesson Summary

When two proportional quantities are graphed on a coordinate plane, the points appear on a line that passes through the origin.

## Problem Set

1. Determine whether or not the following graphs represent two quantities that are proportional to each other. Explain your reasoning.
a.

b.

C.

2. Create a table and a graph for the ratios $2: 22,3$ to 15 , and $1: 11$. Does the graph show that the two quantities are proportional to each other? Explain why or why not.

| $\boldsymbol{x}$ | $\boldsymbol{y}$ |
| :---: | :---: |
|  |  |
|  |  |
|  |  |

3. Graph the following tables, and identify if the two quantities are proportional to each other on the graph. Explain why or why not.
a.

| $\boldsymbol{x}$ | $\boldsymbol{y}$ |
| :---: | :---: |
| 3 | 1 |
| 6 | 2 |
| 9 | 3 |
| 12 | 4 |

b.

| $\boldsymbol{x}$ | $\boldsymbol{y}$ |
| :---: | :---: |
| 1 | 4 |
| 2 | 5 |
| 3 | 6 |
| 4 | 7 |
